

STATEMENT OF PURPOSE

RS23270

The 2011 Legislature recommended that the newly created Sexual Offender Management Board (SOMB) develop procedures for a risk-based, tiered sexual offender registration process to fill the void left by elimination of the Violent Sexual Predator designation process. This proposal creates a 5-level registration and notification system, with registration requirements and duration depending upon the assigned level. The assigned level will be based upon a sexual offender's crime of conviction combined with a measurement of applicable risk factors which have been identified by best practices as contributors to re-offense risk. The SOMB will oversee the level designation process. The Central Sex Offender Registry within the Idaho State Police will continue to maintain oversight of the sexual offender registry as outlined in §18-8305, I.C.

FISCAL NOTE

Impacted agencies will require funding from General Funds to implement this proposal. Funding for this proposal was included in the Governor's FY '16 budget request in the following amounts. Discrepancy from the SOMB's original submission was the result of variable benefit changes:
